2020

Developer

Learning Python and Frontend

On 2020 August 1, I started learning my first programming language Python. By the end of the year, I had become intermediate in Python. I had worked in Telegram Bot making with Pyrogram (MTProto Telegram Library), Backend Development with Fast API, within this period I also learned CS and Bootstrap and made several websites. So, by the end of 2020, I was a Python as well as a Frontend Developer.

2020

Web Developer

Learning Advanced Technologies

In 2020, I have learned ReactJS, Redux, React Router and some other React frameworks.

2021

Full stack Developer

Learning NextJS, Tailwind CSS

In 2021, I have learned NextJS, NextJS API, and Tailwind CSS, and I created a helper package for Pyrogram called tgEasy which have good error handling, and support for Telegram's Anonymous Admins Rights Verification, and some other utility methods.
